

Wiki Project

As we discussed in class on the 29th, your task is to collaboratively create wiki pages that addresses the role in the Age of Exploration for England, France, Spain, and The Netherlands by answering the following three questions for each country:

1. Who were the major/important explorers that sailed for these countries
2. Where did each of these countries explore?
3. How did each of these countries treat the native population of the areas that they explored/colonized?
